Introduce yourself and the project

- **Introduce yourself to the caregiver and show identification.**
- **Introduce the project.**

“In September, we asked some children and caregivers in Tukaley about how we could make the latrines in the village better for children.

When children feel uncomfortable using latrines and they do not use them, this can cause some serious health risks. We recognise that this might be due to the latrines not being child-friendly.

Based on suggestions made by children and caregivers last September, we have made some changes to the latrines with the limited resources available at the moment. To ensure we make the best of these resources, we would like to hear your and your children’s opinion on how you feel about the changes and the latrines presently. This will help us understand if the changes we made resulted in more children using the latrines and if we need to make any further changes to improve them in the future.”

Receive verbal consent

- **Get the caregiver's consent for them to take part and for their children to take part in the survey.**

“As users of the sanitation facilities in the village, I am inviting you and your children to take part in this survey. We value your opinion. There are no wrong answers to the questions we

will ask in the survey. We will use approximately 30 minutes of your and your children’s time to collect all the information. We will be asking questions about your experiences with sanitation facilities and the improvements we made after the engagement in September.

Your participation in this survey is completely voluntary. You can withdraw your consent and stop answering this survey at any time. If you decide that you do not want to answer the survey, there will be no negative effect.

Once the survey has been completed, your answers cannot be withdrawn but the information given by you will be kept anonymous. Your name will not be shared publicly or linked to your answers. We will use what you tell us to help us adapt and manage this project, and a research paper using the survey results may be published. There will be no reward for completing the survey but we hope to use what you tell us to improve the sanitation facilities.

If you have any questions, you can ask me now or contact Save the Children staff in the future.”
